**AIMPOINT® MICRO SERIES WINS  
READERS' CHOICE AWARD**

*Predator Xtreme* Magazine Awards a  
“Readers’ Choice” to the Aimpoint Micro Series Sight

**Chantilly, VA**, May 15, 2013 – Aimpoint, the originator and worldwide leader in electronic red dot sighting technology, has announced that the Aimpoint Micro T-1 sight has received a “Readers’ Choice” Gold award from *Predator Xtreme* magazine as part of the publication’s first annual 2013 Readers’ Choice Awards.

The Aimpoint Micro T-1 is a full featured non-magnifying compact sight that offers predator hunters a very high degree of versatility as it can be mounted on center and rimfire rifles, shotguns, muzzleloaders, handguns, and bows and is night vision compatible with four night vision settings and 8 daylight settings. The Micro H-1 is also available without night vision settings. Weighing only 3.7 ounces, the Micro series of sights are the smallest and lightest red dot sights tough enough to bear the Aimpoint name. The Micro T-1 is fully waterproof, provides up to 50,000 hours (over 5 years) of battery life using a single battery and is available with a 2 or 4 MOA dot.

“Receiving the gold award by the readers of *Predator Xtreme* is a true honor for Aimpoint,” said Dave Pasienski, Director of Commercial Sales at Aimpoint Inc. “*Predator Xtreme* is a highly respected publication representing a fast-growing segment of the hunting market. Being recognized by their readers strongly validates the benefits that Aimpoint sights offer in nearly all hunting applications”.
